

**DRYLOK® FLOOR & WALL  
MASONRY  
WATERPROOFER**

DRYLOK® Floor & Wall Masonry Waterproofing is the first non-pigmented masonry waterproofing specifically formulated to use on bare masonry floor and wall surfaces. Provides a durable, waterproof, easy to clean, non-yellowing high gloss finish.

**FEATURES:**

- Formula:** latex base
- Finish:** clear, high gloss
- Protection level:** 31%±2% solids
- Application tools:** brush, roller, sprayer  
(For spray specifications visit [www.DRYLOK.com](http://www.DRYLOK.com))
- Location:** interior, exterior, vertical, horizontal, below, above grade
- Where to use:** masonry floors, retaining walls, decorative brick and stone facades, concrete slabs, and more\*
- Optional:** if covering with flooring, carpeting, or a water base paint or coating, allow final coat to dry 24 hours
- Specifications:** conforms to ASTM D-7088 Resistance to Hydrostatic Pressure and ASTM D-6904 Resistance to Wind Driven Rain
- CSI Masterformat®:** **07 14 16** COLD FLUID-APPLIED WATERPROOFING  
**09 91 13** EXTERIOR PAINTING  
**09 91 23** INTERIOR PAINTING

**BENEFITS:**

- GUARANTEED to stop water – limited to 4 PSI to help prevent structural damage from pressure cracks
- Protects against 98 mph wind-driven rain
- Abrasion-resistant, high-gloss waterproof coating approved for floor and wall applications
- Use as a moisture vapor barrier on bare concrete floors or as a primer under latex floor paint or prior to applying floor coverings
- Reduces radon gas penetration
- Listed in Masterspec® and BSD SpecLink®
